LANGUAGES

PORTUGUESE (NATIVE)
ENGLISH (FLUENT)

INTERESTS

BUILDING

Robot
Lego
Crochet

SUMMARY

I'm passionate about technology and always on the lookout for new challenges. I started programming with the low-level language C, and then began the transition to higher-level languages like JavaScript. After starting my journey with web development and learning vanilla JavaScript, I deepened my knowledge with frameworks, including React and libraries like Three.js, I am now on my way to becoming a full-stack developer by exploring the MERN stack. I'm looking forward to develop new techniques and learn new technologies.

PROJECTS

MY PERSONAL WEBSITE

My personal website, a landing page that showcases my work, with 3D animations and buttons to download my CV or to schedule a meeting. It is also responsive to accommodate all types of devices.

- React
- React Three Fiber
- TailwindCSS
- Figma

MESSAGEMAIL

A landing page for a website that consolidates all your social media messages into one single app. It has a call to action that will redirect the user to a signup page that is a very simple and intuitive form. It is also responsive.

- React
- TailwindCSS
- Figma

EDUCATION

42 LISBOA

PROGRAMMING

02/2021 - 10/2022

- C
- System Administration
- VirtualMachine
- Data Structure
- Algorithms
- Team Work

UNIVERSITY OF COIMBRA

BACHELORS ANTHROPOLOGY

09/2015 - 07/2018

- Statistics
- Lab Work

BOOTCAMPS

MERN STACK FROM SCRATCH/REACT FRONT TO BACK

BRAD TRAVERSY

03/2023

A react course where we explored the frontend as well as the backend, using the MERN stack.

DESIGNCOURSE

GARY SIMON

01/2023

Design Course where you learn how to design a proper website following some design rules. In the end you're able to understand common mistakes made when creating websites and how to fix them.

THREEJS-JOURNEY

BRUNO SIMMON

12/2022

This course teaches the secrets to build immersive websites, using WebGL with Three.js. During the course you get a deep dive of 3D Animations, textures, modeling lights and a lot more. In the end of the course you're able to put all that knowledge into building some amazing websites.

ODIN PROJECT

THE ODIN PROJECT

11/2022

Open Source course that teaches the basics of JavaScript, HTML and CSS.
